Sage Tech Partner Plus

Sage Intacct

Integrated Payment Processing for Every Business

Simplified Payment Collection

Work seamlessly within the ERP you use every day. Accept customer payments within Sage Intacct using integrated solutions from REPAY.

- Tokenized credit card data
- Level 3 interchange benefits
- Credit card and ACH processing
- No installation, maintenance or set up fees
- 24/7 live support

Accept Payments in Sage Intacct

A gateway and processor, REPAY offers omni-channel B2B and B2C integrated payment solutions for every business. If you do not understand your bill, we can explain how you are currently priced.

Customers can utilize multiple payment methods to pay you anywhere, anytime. Every transaction posts back automatically to Sage Intacct to streamline reconciliation and reduce manual errors.

Avoid Manual Entry

Reduce Errors

Increase Cash Flow

Protect Every Payment

Our platform is PCI-compliant and utilizes tokenization and encryption tools to enhance security. Store recurring payment information in our vault, not on your server.

Qualify For Lower Interchange

Sending Level 3 data with every transaction helps you qualify for lower interchange rates on Visa and Mastercard B2B transactions. We automatically pass the data for you!

Enhance Payment Acceptance

Accept and manage customer card-present and card-not-present transactions within Sage Intacct to simplify payment acceptance of:

- Order Entry Sales Orders
- Order Entry Sales Invoice
- AR Invoices
