REPAY Vault

The REPAY Vault is seamlessly integrated within the Sage 100 solution, allowing you to store customer payment credentials off of your own server for future use. REPAY Vault is a PCI/DSS compliant gateway with multiple reporting tools for reconciliation. Use our tokenized protection and data encryption to further enhance your security.

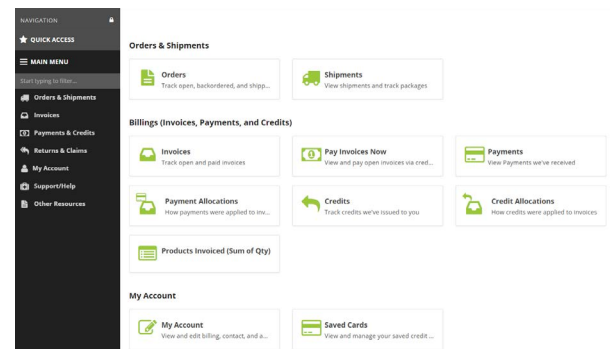

Level 3 B2B Rates

Level 3 processing allows you to receive discounted rates on Visa® and Mastercard® B2B transactions. Level 3 transactions use lower interchange rates than Level 1 and Level 2 transactions. Merchants wanting to receive Level 3 processing rates must be on an Interchange Plus Pricing plan. The Sage 100 integration from REPAY automatically sends the required data to ensure maximum cost savings for B2B transactions.

CIMcloud AR Portal Sage Integration

Take the busywork out of AR! The AR Portal from CIMcloud is available behind a login page and gives customers the freedom to make payments without having to contact your customer service department.

• View payment & order history, account credits, paid & open invoices

• Pay invoices online

• View shipments and shipment tracking info

• Realtime integration with Sage 100 ERP to eliminate manual rekeying and decrease errors

Seamless eCommerce integration

Integrated Sage + eCommerce Payments

CIMcloud for Sage offers seamless integration with REPAY for secure payments. The integration accepts all payment types directly in CIMcloud and then flows directly into Sage - eliminating any need for duplicate entry. One payment gateway for both platforms provides you with the ability to access the same credit card token ID, making it easier to issue refunds and voids and process future payments. Transactions and payments also flow into a central database for reporting.
